## Technical Analysis

**Strategy:** The benchmark KSE-100 index closed at 153,966.4, gaining 1,225.98 points, reflecting a short-term rebound after recent selling pressure. The recovery from the lower Bollinger Band suggests easing bearish momentum, however the index still trades below key short- to mid-term moving averages, indicating that the broader trend remains under pressure. Immediate resistance is now seen in the range of 154,700 – 155,500, where a decisive break can extend the rebound towards 156,750-157,190. On the downside, support is placed at 153,415 – 152,800, and any breach of this zone may re-trigger selling towards 152,350 - 151,750 levels. Overall, the current bounce appears corrective in nature unless the index sustains above near-term resistance, therefore a cautious approach with selective buying on dips is recommended.
